

POLFLAM® fire-resistant curved glass was a hit of the FENSTERBAU 2016 fair

The recently held FENSTERBAU-FRONTALE exhibition in Nurnberg is a most renowned glass industry event in Europe. The product brought out by POLFLAM has been a true hit of the prestigious fair.

the glazed fire-resistant curtain wall mounted in the frameless system – were all displayed as a corner part of the structure of their stand. The latter made it possible to exhibit the substantial strengths of POLFLAM® glass: its perfect transparency and the thinness of the glass panel.

Another attractive opportunity included sample calculations for structures where specific POLFLAM® glass was to be used in various types of joinery, in the frameless system and for fire-resistant floors (begin-

The curved fire-resistant glass which has been exhibited for the first time attracted great interest among visitors and was a genuine hit of the fair. Many designers and system providers had this unique opportunity to see the product live.

The visitors could also see a demo set of POLFLAM® glass in all the available fire-resistance classes, from EI 30 to as high as EI 180. A set of materials with technical data for glass of different application was available in an electronic version to email at the visitor's address using a mobile application prepared for the fair.

When conceiving its exhibition, POLFLAM focused on the most interesting products it had on offer. The large-size fire-resistant glass, the curved fire-resistant glass and

ning with entering the elements, all the way through calculations up to optimisation of the cutting). For that purpose, a renowned LogiKal® system of ORGADATA was used.

This year's edition of the fair broke attendance record; more than 110 thousand people visited the exhibition facilities over the four days. Two thirds of them came from outside Germany.

The products exhibited by POLFLAM attracted the attention of visitors from all over the world, including those from Mexico or Ecuador.
